

Perform Global Inc.

From Unified Data to Intelligent Action with AI-Powered Automation

In this era when data is pivotal, enterprises grapple with fragmented data and inefficient processes that hinder growth. Perform Global Inc. (PGI), a leader with 13 years of expertise in Tableau data visualization and 6 years in UiPath process automation, joins forces with Denodo, a leader in logical data management. Together, we provide a transformative, end-to-end solution. We connect PGI's secure, on-premises AI Agent platform to a unified, real-time data-access layer, enabling enterprises to not only see their data, but to act on it with unparalleled intelligence and efficiency.

The Business Challenges We Solve

Fragmented Data Hinders AI and BI

Critical business data is locked in disparate systems, making it impossible to create comprehensive Tableau dashboards or for AI Agents to access the complete, real-time information needed to accurately perform complex tasks.

Automation Gaps in Complex Processes

While traditional robotic process automation (RPA) can handle simple tasks, critical business processes — like cross-system financial reconciliation, compliance monitoring, and dynamic knowledge retrieval — are too complex, still requiring significant manual effort, which leads to delays and errors.

Insecure, Ungoverned AI Implementations

Deploying generative AI (GenAI) solutions in the enterprise demands stringent data security. Businesses need a secure, on-premises solution that can leverage internal knowledge without exposing sensitive data to public cloud services.

Our Solution

Our unique offering is an enterprise-grade, on-premises AI Agent platform that functions as a “core brain” for the enterprise, driving GenAI-powered process automation. The Denodo/PGI solution provides a complete, three-tiered approach to operationalizing your data:

- 1. Unified Data Access (Powered by Denodo):** We establish a real-time data fabric that provides a single source of truth across the entire organization without costly data replication.
- 2. Intelligent Visualization (Powered by PGI's Expertise in Tableau):** Our Tableau specialists leverage this unified data to build rich, interactive dashboards, transforming complex information into clear, actionable business intelligence.
- 3. Autonomous Action (Powered by PGI AI Agents and UiPath):** Our secure, on-premises AI Agents and UiPath bots act on these insights, automating complex, end-to-end workflows by interacting with your enterprise systems and knowledge base.

The PGI + Denodo Partnership

Through our partnership with Denodo we bring deep multi-disciplinary expertise to deliver intelligent automation solutions.

The **Denodo Platform** is a **logical data management** solution that enables real-time access to data across disparate sources, including the siloed applications within individual data lakehouses, without requiring the data to first be consolidated into a common repository.

Together, we offer:

- **Real-time Comprehensive Dashboards:** By combining Tableau with Denodo's live, virtualized data, we **enable organizations to design and build** real-time, comprehensive management dashboards, providing decision-makers with access to the most current and complete business insights on demand.
- **AI-Powered Knowledge Center:** PGI's platform transforms your internal documents and data — unified by Denodo — into a secure, conversational knowledge base, enabling employees and agents to get accurate answers to complex queries, instantly.
- **Hyperautomation of Complex Workflows:** We combine UiPath's powerful RPA with PGI's intelligent AI Agents, enabling the automation of intricate processes that require both rule-based execution and cognitive decision-making based on real-time, governed data.

We bring the benefit of a complete, end-to-end data value chain, from integration to visualization and intelligent action, with demonstrated expertise across disciplines.

About PGI

Perform Global Inc. (PGI) is a leader in intelligent automation and AI-driven enterprise solutions, serving mature markets across the Asia-Pacific region, including Taiwan, Singapore, Malaysia, India, and Hong Kong. We specialize in helping enterprises in government, BFSI, healthcare, and manufacturing sectors accelerate digital transformation and achieve measurable growth and savings.

Our core competency lies in our comprehensive, multi-domain technical expertise across four key pillars:

1. **Automation:** Leveraging premier platforms like UiPath, we deliver robust process automation solutions.
2. **AI:** We deploy advanced AI capabilities with our proprietary on-premises PGI AI Agent platform.
3. **Data:** With 13 years of proven experience, we are masters of data visualization and management using technologies like Tableau and Denodo.
4. **Infrastructure:** We build resilient enterprise systems with partners like Dell and RedHat.

We are obsessed with the results our clients gain. Our approach is founded on combining deep technical skill with industry understanding, enabling us to deliver value with speed, precision, and security. We commit to a standard of "Delivery Excellence: First Time, Do it Right," fostering unwavering trust with our partners. Our mission is to help APAC enterprises innovate through AI and data engineering, and we are committed to delivering \$1 billion in business value for our clients within the next five years.

About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading logical data management platform for transforming data into trustworthy insights and outcomes for all data-related initiatives across the enterprise, including AI and self-service. Denodo's customers in all industries all over the world have delivered trusted AI-ready and business-ready data in a third of the time and with 10x better performance than with lakehouses and other mainstream data platforms alone.

“

“At PGI, our mission has always been to solve our customers' most complex challenges in intelligent automation and data-driven decision-making. Our partnership with Denodo takes this commitment to the next level. Our joint solution directly addresses the critical gap between accessing unified data and acting on it at scale, providing clients with immediate benefits like accelerated AI-powered insights, hyperautomation of complex business processes, and a secure, on-premises foundation for enterprise-grade GenAI. We are proud to deliver tangible business value together.”

— William Su, President, PGI
