

Kermitech

End-to-End Data Solutions by Industry Experts

At Kermitech, we transform complex data challenges into strategic business advantages. As a Denodo Silver Partner in the EMEA region, we leverage our extensive experience and certified expertise to deliver end-to-end data solutions that drive innovation and growth. With a proven track record of success with industry leaders like Shell Oil and Gas and DNB, we offer more than just technical solutions, we provide strategic partner-expertise that aligns with your business goals.

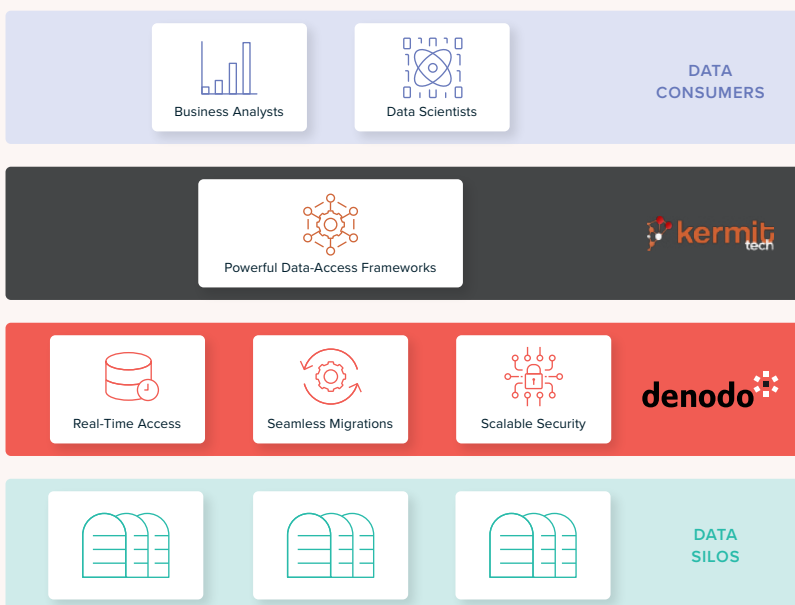

The Business Challenges We Solve

Kermitech's solutions, powered by the Denodo Platform, address critical industry challenges:

- **Data Silos Hindering Decision-Making:** Data silos exist between legacy and modern systems, different cloud systems, and even different applications within the same data lakehouse, making it time-consuming and complex to make a decision based on disparate data sources.
- **Complex Data Migrations:** Migrations often require downtime, when the data is being transferred from the current system to the new one. For this reason migrations must be carefully managed to minimize this impact.
- **Scalability and Security Concerns:** Data security can hinder scalability, as each existing and additional server needs to be protected, while adhering to the complex access protocols established by each organization.

Our Solution

1. **Unified Data Access for Faster Insights:** By leveraging the Denodo Platform, we break down silos, providing a single, real-time view of your data. This empowers faster, data-driven decisions, boosting efficiency and competitiveness.
2. **Seamless and Secure Migrations:** Our proven frameworks simplify complex migrations and acquisitions, enabling secure, disruption-free transitions. We align data strategies with your business goals for maximum impact.
3. **Scalable, Secure Infrastructure:** We deliver robust solutions that scale effortlessly with your growth while prioritizing security through Denodo's advanced features like encryption and access controls, facilitating compliance and establishing trust.

The Kermit Tech + Denodo Partnership

Through our partnership with Denodo, we transform data challenges into opportunities, delivering measurable results with agility and precision.

The **Denodo Platform** is a **logical data management** solution that enables real-time access to data across disparate sources, including the siloed applications within individual data lakehouses, without requiring the data to first be consolidated into a common repository.

Kermit Tech's data engineering expertise, combined with the Denodo Platform, offers a powerful approach to tackling complex data challenges. Here's how it works and the specific benefits it delivers:

- **Seamless Data Integration and Virtualization:** The Denodo Platform's data virtualization capabilities unify disparate data sources—on-premises, cloud, or hybrid, without having to move data physically. Kermit Tech leverages this to provide real-time access to a centralized, logical data layer, speeding up insights and decisions. Customers enjoy faster, agile data access, cutting time-to-value for key projects.
- **Enhanced Security and Governance:** Together, we deliver robust security with data masking, encryption, and fine-grained access controls. Kermit Tech keeps the company in compliance with all applicable regulations (e.g., GDPR), while Denodo's data governance capabilities uphold data integrity. This lets customers innovate with confidence, knowing their data is secure and trusted.
- **Scalable, Cost-Efficient Architecture:** Denodo's logical data layer, paired with Kermit Tech's frameworks, eliminates redundant storage and complex extract, transform, and load (ETL) processes. This reduces costs and simplifies scaling. Customers gain an agile, future-proof data ecosystem.

The synergy between Kermit Tech and Denodo creates a solution greater than the sum of its parts, offering real-time insights, security, and efficiency.

About Kermit Tech

At Kermit Tech, we believe in the power of data to transform businesses. Our commitment to excellence, client-first approach, and unwavering work ethic set us apart as a trusted partner for organizations seeking to unlock the full potential of their data. Whether it's breaking down data silos, ensuring compliance, or scaling infrastructure, we deliver solutions that are tailored to meet the unique needs of each client. With a focus on delivering measurable results, Kermit Tech is your strategic ally in navigating the complexities of the modern data landscape. Let us help you turn your data into a powerful asset for growth and innovation.

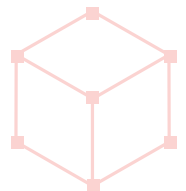

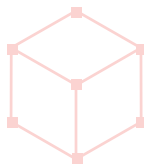

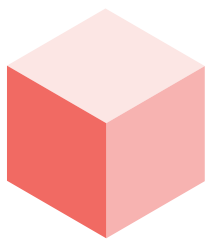

About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading logical data management platform for transforming data into trustworthy insights and outcomes for all data-related initiatives across the enterprise, including AI and self-service. Denodo's customers in all industries all over the world have delivered trusted AI-ready and business-ready data in a third of the time and with 10x better performance than with lakehouses and other mainstream data platforms alone.

“

“At Kermit Tech, we see data as the lifeblood of modern business. With over 25 years experience in data engineering, we've enabled businesses to tap into their data's potential. As a Denodo Silver Partner in EMEA, we use advanced virtualization to craft innovative, scalable, secure solutions. We turn complex data challenges into strategic wins, keeping you ahead digitally. Partner with us to fuel growth with your data.”
