

IQZ Systems

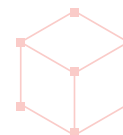

Turning Business
Complexity into Clarity

IQZ Systems transforms complex data challenges into accessible business advantages through our authentic technology partnership approach with Denodo.

While other consulting companies focus on technical specifications, our implementation of Denodo's powerful logical data management capabilities stands apart by enabling practical, business-focused solutions and value-driven delivery. We help organizations to meet their data-driven goals through our commitment to transparent communication.

We bridge the gap between sophisticated data technology and everyday users, so organizations can not only connect disparate data sources but are truly empowered to leverage unified information for better decision-making.

With IQZ Systems and Denodo, organizations gain a trusted partnership committed to your success through integrity, passion, respect, and excellence.

The Business Challenges We Solve

SECURE DATA SHARING

Industries face increasing pressure to share data securely across multiple channels, and also with third-party providers to meet Open Insurance mandates. Organizations struggle to establish secure data-sharing environments that maintain compliance without adding unmanageable technical complexity or security vulnerabilities.

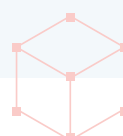

PERSONALIZATION OF CUSTOMER EXPERIENCES

Companies across industries aim to deliver highly personalized customer experiences based on complete customer views, but they struggle to unify fragmented customer data from disparate sources.

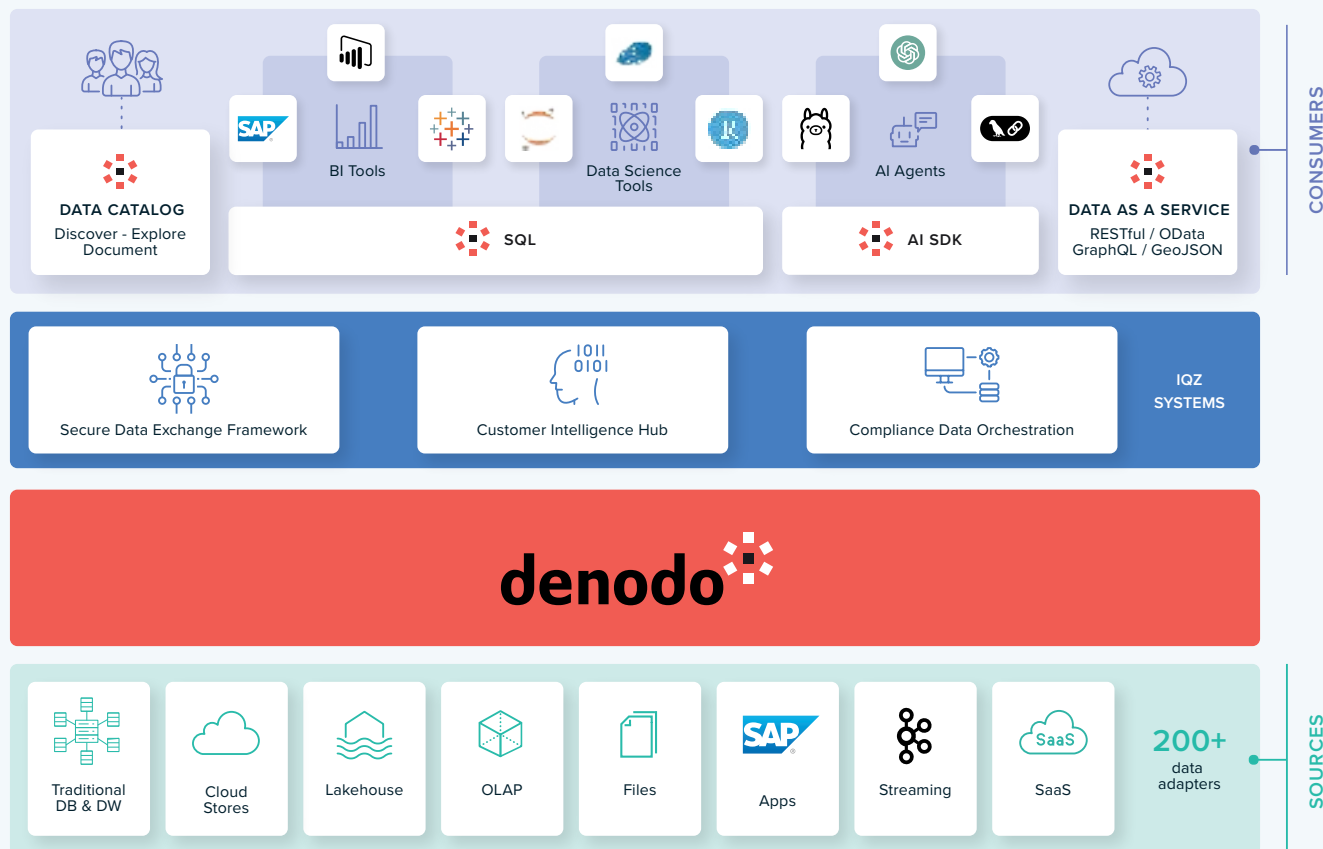

REGULATORY COMPLIANCE

Regulated industries face mounting, ever-changing compliance requirements that demand consolidated, accurate data across the enterprise. Organizations struggle to create consistent, complete data views for regulatory reporting without costly data duplication, reconciliation issues, or time-consuming manual processes.

Our Solution

Secure Data Exchange Framework: IQZ Systems implements secure data sharing environments that enable collaboration without compromising security or compliance. Our solution creates controlled access points to critical data assets, enabling organizations to share specific data securely with partners, regulators, and third parties while maintaining data governance and auditability. This approach is delivered through strategic integrations of secure APIs and robust security frameworks, enhanced by comprehensive permission controls and detailed audit logging to further enhance the capabilities of the Denodo Platform.

Customer Intelligence Hub: IQZ Systems' Customer Intelligence Hub integrates fragmented customer data from disparate systems into a unified, accessible view without disruptive migrations. Our human-centered implementation approach enables the solution to deliver personalization capabilities that business users can easily leverage, with intuitive interfaces that translate complex customer data into actionable personalization opportunities at every touchpoint.

Compliance Data Orchestration: Our Compliance Data Orchestration solution creates consolidated views of enterprise data specifically designed for regulatory reporting and compliance requirements. IQZ Systems implements this solution with a values-driven approach that prioritizes data accuracy, auditability, and governance, while making compliance data accessible to non-technical stakeholders who must meet regulatory demands.

By Integrating Denodo's logical data management platform with our tailored technology solutions, we have enabled our joint customers to gain:

- **Automated compliance:** Financial advisors can now focus more on providing personalized service to their clients, strengthening client relationships and trust.
- **Legal Team Empowerment:** The legal team at this leading organization was equipped with the tools needed to review each request thoroughly. They could approve, suggest corrections, or reject requests, enabling strict compliance with regulations.
- **Real-time Visibility:** Field agents at this company gained real-time visibility into the status of advertising requests. This transparency empowered them to make immediate corrections, if necessary, expediting the approval process.

The IQZ Systems + Denodo Partnership

Through our partnership with Denodo we offer powerful business-contextual data views, providing real-time, secure, and unified data access for clients, as well as personalization and compliance reporting capabilities.

The **Denodo Platform** is a **logical data management** solution that enables real-time access to data across disparate sources, including the siloed applications within individual data lakehouses, without requiring the data to first be consolidated into a common repository.

Together, we offer:

- **Accelerated Deployment:** New-node provisioning in under 20 minutes
- **Seamless API Integration:** Effortless cloud application data consumption
- **Total Infrastructure Control:** Rapid scaling, replication, and rollback
- **Enhanced Reliability and Security:** Continuous availability with enterprise-grade protection
- **Unprecedented Processing Scale:** Over 360 million claims processed in a week
- **Near-Perfect Accuracy:** 99.96% accuracy rate
- **Accelerated Platform Adoption:** Minimal further processing required
- **Ahead-of-Schedule Delivery:** Early project completion

Our values-driven approach to Denodo implementations reduces time-to-value, delivering early business wins and sustainable architectures within weeks, with transparent communication. We create a self-service environment for safe data access and analysis, bridging IT governance and business agility for faster, informed decision-making.

About IQZ Systems

IQZ Systems is a values-driven technology partner that specializes in transforming complex challenges into accessible, business-focused solutions. Our proven methodology emphasizes early value delivery, user adoption, and sustainable solutions that evolve with your business. When you partner with IQZ Systems, you gain more than technical expertise—you gain a committed ally who takes genuine accountability for your success and builds lasting relationships based on trust, respect, and mutual growth.

About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading logical data management platform for transforming data into trustworthy insights and outcomes for all data-related initiatives across the enterprise, including AI and self-service. Denodo's customers in all industries all over the world have delivered trusted AI-ready and business-ready data in a third of the time and with 10x better performance than with lakehouses and other mainstream data platforms alone.

“

“Technology should solve real business problems, not create new ones. Our authentic technology partnership approach means we focus on practical solutions that deliver measurable outcomes, not simply showcase technical wizardry that adds unnecessary complexity. In an industry that often prioritizes quick fixes, we're building lasting partnerships. IQZ Systems isn't just your vendor—we're your invested ally in creating sustainable technology solutions that evolve as your business grows.”

— TK Sathish, chief technology officer, IQZ Systems
