

Enabling Companies to Gain Business Value From Their Data

Edgematics is a niche consulting powerhouse specializing in data monetization through cutting-edge data engineering, governance, and artificial intelligence/machine learning (AI/ML) solutions. Our proprietary platforms – PurpleCube AI and Axoma – enable organizations to unify, automate, and activate their data with speed, accuracy, and intelligence. Whether you're modernizing legacy systems or scaling AI initiatives, we deliver faster deployments, lower total cost of ownership (TCO), and enable real-time insights with enterprise-grade compliance. Partner with us to turn your data into a monetizable competitive advantage - securely, scalably, and strategically.

The Business Challenges We Solve

Fragmented Data Infrastructure: Enterprises struggle with siloed systems, inconsistent data quality, and outdated architectures that limit agility and decision-making.

Slow and Costly Digital Transformation: Traditional approaches to data modernization are time-consuming and expensive, and they often fail to scale or deliver measurable ROI.

Lack of Scalable AI and Governance: Organizations face difficulties operationalizing AI/ML at scale while maintaining data privacy, lineage, and compliance across hybrid environments.

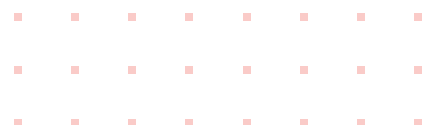

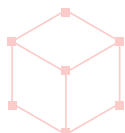

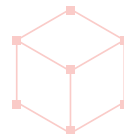

We directly address these issues by offering streamlined, metadata-driven platforms and consulting frameworks that unify, automate, and govern data end-to-end.

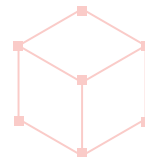

Our Solution

We deliver a comprehensive, AI-powered data transformation ecosystem through our proprietary platforms – PurpleCube AI and Axoma – backed by deep consulting expertise.

- We unify and automate fragmented pipelines with pre-built connectors, agile templates, and orchestration tools.
- Our solutions enable 60–70% faster deployment, lower TCO, and real-time data access across on-premises and cloud environments.
- We enable AI readiness with embedded governance, including lineage, quality, and cataloging—making data secure, compliant, and insight-ready.

Whether you're building a data-driven culture or scaling enterprise AI, we empower you with the tools, strategy, and speed to solve today's most pressing data challenges.

The Edgematics + Denodo Partnership

In partnership with Denodo, our PurpleCube AI extends the powerful data virtualization, orchestration, governance, and AI-readiness capabilities of your data.

The Denodo Platform is a logical data management solution, powered by data virtualization, that enables real-time access to data across disparate sources, including the siloed applications within individual data lakehouses, without requiring the data to first be consolidated into a common repository.

Together, we offer:

Seamless Integration:

Our solution offers pre-built connectors and metadata synchronization for rapid onboarding and smooth interaction with the Denodo Platform's logical data layers.

Enhanced Governance:

We add centralized lineage, quality monitoring, and cataloging to enable compliant, trustworthy, virtualized data.

AI Enablement:

Together, we make virtualized data AI-ready by operationalizing it through our generative AI (GenAI) platform Axoma, enabling advanced analytics and real-time insights.

This combined solution enables faster deployment, reduced complexity, and a governed, insight-ready data layer empowering customers to unlock maximum value from their virtualized environments..

At Edgematics, we believe that data is the most valuable asset an organization can monetize when unlocked effectively. Our partnership with Denodo enables us to bring powerful synergy to enterprises, combining Denodo's leading logical data management capabilities with our AI-driven orchestration and governance frameworks. Together, we enable customers to unify, trust, and operationalize their data, faster and at scale.

This joint solution helps businesses move beyond traditional data management into a future of real-time insights and intelligent decision-making."

— Rushikesh Kulkarni, chief operating officer, Edgematics

About Edgematics

We are a global data and AI consulting firm helping organizations unlock the full value of their data through specialized monetization strategies, advanced platforms, and deep industry expertise. Operating across the UAE, UK, US, Saudi Arabia, and India, we deliver measurable impact through services in data engineering, governance, and AI/ML. Our proprietary platforms — PurpleCube AI and Axoma — enable unified data orchestration and secure generative AI. With 500+ years of combined experience, 25+ accelerators, and 65+ global clients, we drive agile, scalable data transformations that reduce TCO, accelerate deployment, and provide long-term value. About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading logical data management platform for transforming data into trustworthy insights and outcomes for all data-related initiatives across the enterprise, including AI and self-service. Denodo's customers in all industries all over the world have delivered trusted AI-ready and business-ready data in a third of the time and with 10x better performance than with lakehouses and other mainstream data platforms alone.
