

NAIB IT

Scaling Denodo Value for Enterprise Growth

NAIB IT empowers enterprises to unlock the full potential of the Denodo Platform by extending its capabilities with deep domain expertise, widely available Denodo certified resources, advanced integration frameworks, GenAI solutions, and tailored data strategies. We don't just deploy Denodo, we scale its value, accelerate time-to-insight, and turn data into a strategic growth engine across your organization.

The Business Challenges We Solve

Fragmented Data Ecosystems and Low Visibility

Enterprises struggle with scattered systems, inconsistent metadata, and poor discoverability. NAIB IT's enterprise data architecture audits and health checks ensure every system is mapped, optimized, and fully discoverable — maximizing the effectiveness of Denodo's logical data management layer.

Escalating Data Governance and Sovereignty Pressures

With stricter regulatory requirements across the region, organizations face heightened risks around data residency, access control, and compliance. NAIB IT strengthens Denodo deployments with advanced data security frameworks that enforce governance, sovereignty, and policy automation, at scale.

Inefficient Insight Delivery and Operational Bottlenecks

NAIB IT adds deep domain expertise and proven implementation accelerators that unlock faster performance, cleaner data flows, and measurable business value.

Our Solution

NAIB IT delivers an end-to-end value layer on top of Denodo, designed to help enterprises overcome fragmentation, governance pressures, and operational inefficiencies.

- **Unified Data Visibility and Architecture Optimization:** Through comprehensive data architecture audits and system health checks, we make every data source discoverable, well-structured, and ready for seamless data virtualization, which unlocks Denodo's full potential.
- **Embedded Governance, Security and Sovereignty Controls:** We integrate advanced data security models, policy frameworks, and sovereignty enforcement mechanisms directly into the Denodo environment, enabling compliance and controlled access across all enterprise domains.
- **Accelerated Value Realization and Operational Efficiency:** Using proven implementation accelerators, performance tuning, and best-practice design patterns, we help customers achieve faster insights, improved data consistency, and measurable business impact.

The NAIB IT + Denodo Partnership

NAIB IT's solution enhances and extends Denodo's logical data management capabilities by providing a structured, enterprise-ready framework around it.

The **Denodo Platform** is a **logical data management** solution, powered by **data virtualization**, that enables real-time access to data across disparate sources, including the siloed applications within individual data lakehouses, without requiring the data to first be consolidated into a common repository.

NAIB IT enables these sources to be fully discoverable, optimized, and compliant with governance and sovereignty policies. Our advanced architecture audits, performance tuning, and implementation accelerators complement Denodo by reducing integration complexity, improving query efficiency, and enabling faster insight generation. Additionally, we integrate GenAI capabilities and a robust data visualization layer on top of Denodo.

Together, we offer:

- **Enhanced Data Virtualization + Full System Discoverability:** Denodo unifies access to distributed data, while NAIB IT's architecture audits and health checks make every source clean, optimized, and ready for virtualization - resulting in faster onboarding and reduced integration complexity.
- **Built-In Governance, Security, and Sovereignty Enforcement:** Denodo provides role-based access and data masking; NAIB IT augments this with advanced governance frameworks, policy automation, and regional sovereignty controls to facilitate compliance and secure data sharing.
- **Operational Acceleration and Reduced Time-to-Insight:** Denodo's real-time data delivery is strengthened by NAIB IT's performance tuning, best-practice design patterns, and implementation accelerators - enabling enterprises to achieve higher agility, consistent data quality, and quicker decision-making.

Through our strategic partnership with Denodo, we enable customers to leverage cutting-edge data virtualization technology enhanced with NAIB IT's specialized governance models, architecture audits, sovereignty controls, and performance accelerators. This combined value proposition enables enterprises to make faster decisions, reduce integration overhead, streamline operations, and enable long-term compliance in an increasingly complex regulatory landscape.

Focused on quality, innovation, and measurable outcomes, NAIB IT is committed to helping organizations transform their data landscapes and build a resilient digital future.

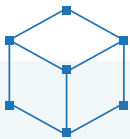

About NAIB IT

NAIB IT is a leading technology solutions provider specializing in enterprise data modernization, digital transformation, and advanced architecture services across the Middle East. With a strong focus on operational excellence, we empower organizations to build secure, scalable, and insight-driven data ecosystems that accelerate business growth and innovation. Our expertise spans data governance, data security, enterprise architecture optimization, integration strategy, and cloud enablement – supported by a team of seasoned consultants with deep domain knowledge across key industries including government, energy, manufacturing, and financial services.

At NAIB IT, we believe data is the foundation of every successful digital initiative. Our mission is to help enterprises unlock the full value of their data by making it accessible, trustworthy, secure, and strategically aligned with business objectives. We bring a holistic approach that blends world-class technology platforms with best-practice frameworks, local regulatory awareness, and future-ready architectural design.

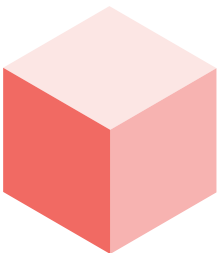

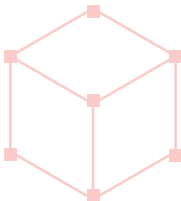

About Denodo

Denodo is a global leader in data management, powering trustworthy AI agents and applications. The Denodo Platform, an award-winning logical data management solution, transforms enterprise data into reliable insights for AI, analytics, and self-service initiatives. Organizations worldwide use Denodo to deliver AI-ready, business-ready data in a fraction of the time compared to traditional data lakehouses, achieving up to 4x faster time-to-insight, 345% ROI, and 10x better performance.

“By combining Denodo’s powerful logical data management capabilities with NAIB IT’s deep expertise in governance, security, and enterprise architecture, we enable our customers to unlock data value faster, safer, and with far greater efficiency. This partnership empowers organizations to operate with confidence, accelerate innovation, and turn their data into a true competitive advantage.”
